## (54) IMAGE PICKUP DEVICE AND IMAGE REPRODUCING DEVICE

### (57)Abstract:

PROBLEM TO BE SOLVED: To record or display a pickup district name with a picked-up image through a simplified configuration of a camera.

SOLUTION: A global positioning system(GPS) section 28 is provided to a still video camera 11. The GPS section 28 receives a signal and longitude/ latitude information from an artificial satellite. The longitude/latitude information is stored in a floppy disk 19 with image pickup data. In the case of printing, the longitude/latitude information is read with the image data. A geographical database is retrieved based on the longitude/latitude information to locate an image pickup district name. Furthermore, an object title is decided based on image pickup azimuth information, focal distance information of an image pickup lens. Character of the image pickup date and time, the image pickup district name, and the object title or the like are printed out on a hard copy.

### LEGAL STATUS

[Date of request for examination] 06.02.2002  
 [Date of sending the examiner's decision of rejection]  
 [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]  
 [Date of final disposal for application]  
 [Patent number]  
 [Date of registration]  
 [Number of appeal against examiner's decision of rejection]  
 [Date of requesting appeal against examiner's decision of rejection]  
 [Date of extinction of right]
